

Researcher Profile:

**DANIEL
JOLIN**

SENIOR, COMPUTER ENGINEERING

WHAT HAS BEEN YOUR PROUDEST ACCOMPLISHMENT IN RESEARCH?

My proudest accomplishment so far was presenting at the 2023 Summer Symposium. It was really a crowning achievement for me as a first-generation citizen and college student. My entire family got to see and witness the experience with me, so that was pretty memorable.

HOW HAS RESEARCH CONTRIBUTED TO YOUR UNDERGRAD EXPERIENCE?

It has completely changed my academic experience. I found myself in classes and labs learning material that I've more than likely have done before through research, so I feel it gave me an upperhand.

ADVICE FOR SOMEONE WHO WANTS TO PURSUE RESEARCH WITH OUR?

Get to know the mentors you want to work with and figure out what type of research you are interested in and what best suits you. I want to advocate this opportunity to more students because it is an amazing opportunity around campus and would be beneficial if more people knew about it.
